

IRAN STONE
C O M P A N Y

About Us :

Mirzaee holding/group of mines and companies, with 55 years of experience (in the field of natural stones) since 1963 with the original goal of production and processing of a vast variety of natural stones for building and commercial use in the shape of blocks has been established and active. In 1980 this holding/group after years of activities in creation of job opportunities in it's own territory, established Nimru stone industrial company and due to growth of holding capacity by twice, in first ten years of its life, in 1981 they opened the stone mine in Laaibeed Isfahan and established themselves as extractors ...

In 1991 the second generation of this family was established another 2 units of mine extractors in 1992 and further in 2003 with the ambition of entering the world export business in terms of processing the group/holding bought two lines of slab production with two Italian Barsanti saws and tiles.

This group/holding with more than 150 professional subordinates and specialists, and with over half a century of experience, in present, has 5 active mines across Iran including Hajiabad travertine, Beed marble, Kurdistan-Gharveh marble and Marfilla marble. Plus there are three unit factories for cutting and processing natural stones for slab, tile and cut to size orders.

The general manager of the holding Hasan Mirzaee a member of the board of Iran natural stones and mines, hopes the taste of architectures and project managers will brighten the future of the road this holding has been in for all theses years and the use of this unique and rich in quality Iranian marbles and travertines in future will accumulate all around the globe.

Annual production capacity of mines and factories:

- Haji Abad travertine mine is 50,000 tons per year.
- Crystal Lybid mine is 35,000 tons per year.
- Crema marfil marble mine is 35,000 tons per year.
- Ghorve(Davin Stone) marble mine is 27,000 tons per year.
- Cream Kerman marble mine is 20,000 tons per year.
- Crema marfil marble mine is 35,000 tons per year.
- 120.000 M² of Slabs per year.
- 150.000 M² of Tile per year.

All these figures can increase by 50 percent, in accordance to demand.
